

(a) Annualised real income growth by group, 1996–2023

(b) High minus low GACI-growth tercile (95% CI)

Note: one observation per country (first to last year with complete WID and GACI data, span ≥ 15 years). Terciles by annualised change in $\ln \text{GACI}_{\max}$. WID pretax national income, equal-split adults, constant local prices. Deciles left of the dotted line; top fractiles right.
